

## Guidelines for Contributed Papers for the AES Annual Conference

Submission in the Contributed Paper category can be either in the form of an extended abstract or a full paper – in each case, please, follow these guidelines below and upload the pdf version of your document when submitting the application.

1. Extended abstract: follow the template in Annex 1.
2. Full paper: follow the guidelines for the Journal of Agricultural Economics (with length not exceeding 7000 words). To standardise submissions use the title page shown in Annex 2.

Accepted Contributed Papers will be made available to delegates through the AES website after the conference. In addition, papers from the conference are normally archived on the AgEcon Search repository at the University of Minnesota. If you would rather not have your paper included on AgEcon Search, please let us know.

*Vera Eory, AES Programme Secretary, 2016*

## Annex 1 – Extended abstract for Contributed Paper session

<b>Paper Title</b>	Paper title.
--------------------	--------------
