Report to the Agricultural Economic Society

I am grateful to the Agricultural Economic Society for awarding me a travel grant to attend the 32nd International Conference of Agricultural Economists (ICAE) “Transformation Towards Sustainable Agri-Food Systems”, 2-8 August 2024, New Delhi, India.

My participation at the Congress included the following contributions:

- A Data Envelopment Analysis to Explore the Relationship between Labour and Environmental Diversification of Livestock Farms (lead author, contributed paper). AES support has been acknowledged
- Identifying Incentive Mechanisms to Improve Food Systems Data Availability – a Systems Thinking Approach (lead author, poster presentation). AES support has been acknowledged
- An Investigation of the Argentinian and British Consumers’ Perceptions of Antimicrobial Use Alternatives to Control Disease on Poultry Farms (lead author, poster presentation). AES support has been acknowledged
- Introduction of New Food Products during the Inflationary Period in the United Kingdom: The Case of Ready Meal Products (co-author, poster presentation). AES support has been acknowledged
- Do Consumers in the UK and Argentina Value the Use of Natural Alternatives to Antibiotics in Poultry Farming? (co-author, poster presentation)
- Economic Analysis of Using Tannin As an Alternative Growth Promoter on Poultry Farms (co-author, poster presentation)
- Livestock and Animal-Sourced Foods: Do We Need Sustainable Alternatives? Invited panel member

In addition to having the opportunity to present and discuss my research, and learn about other researchers’ work, my participation to the congress has facilitated networking with colleagues and thus potentially build the foundations for further collaborations.

Many thanks,

Luiza Toma
